

### **Word of the Week for May 3, 2009**

Reports and conversations from this past week are filled with talk about the Swine Flu sweeping across the world. It is a very serious situation according to health experts and should not be taken lightly. One health expert said, “It is a virus that can spread quickly and impact life dramatically.”

I love that phrase . . . it “can spread quickly and impact life dramatically.” How amazing would it be if those were the words our news media used for the growth and expansion of Christianity?

The talk last week may have been about the Swine Flu making people sick, but I say we make all future conversations about the Gospel of Christ making people well!

I hope you have a healthy and happy week!
